Dear Ms. Ruchi Kalra,

Re: Review of CRISIL Rating on the Rs.100 Crore Long Term Principal Protected Market Linked Debentures of Oxyzo Financial Services Private Limited

All ratings assigned by CRISIL Ratings are kept under continuous surveillance and review.

CRISIL Ratings has, after due consideration, upgraded its rating on the captioned debt instrument to CRISIL PPMLD A+/Stable (pronounced as CRISIL PPMLD A plus rating with Stable outlook) from CRISIL PPMLD A (pronounced as CRISIL PPMLD A rating) and removed the rating from Rating watch with Developing Implications. Securities with this rating are considered to have adequate degree of safety regarding timely servicing of financial obligations. Such securities carry low credit risk.

A prefix of 'PP-MLD' indicates that the instrument is a principal-protected market-linked debenture. The terms of such instruments indicate that while the issuer promises to pay back the face value/principal of the instrument, the coupon rates of these instruments will not be fixed and could be linked to one or more external variables such as commodity prices, equity share prices, indices, or foreign exchange rates. Therefore, payments on the rated instrument have significant risks other than credit risk. This could result in variability in returns because of adverse movement in value of the external variables, and/or possible material loss of principal on early redemption of the instrument. The risk of such adverse movement in price / value is not addressed by the rating.

In the event of your company not making the issue within a period of 180 days from the above date, or in the event of any change in the size or structure of your proposed issue, a fresh letter of revalidation from CRISIL Ratings will be necessary.

As per our Rating Agreement, CRISIL Ratings would disseminate the rating along with outlook through its publications and other media, and keep the rating along with outlook under surveillance for the life of the instrument. CRISIL Ratings reserves the right to withdraw, or revise the rating / outlook assigned to the captioned instrument at any time, on the basis of new information, or unavailability of information, or other circumstances which CRISIL Ratings believes may have an impact on the rating. Please visit www.crisilratings.com and search with the name of the rated entity to access the latest rating/s.

As per SEBI circular (reference number: CIR/IMD/DF/17/2013; dated October 22, 2013) on centralized database for corporate bonds/debentures, you are required to provide international securities identification number (ISIN; along with the reference number and the date of the rating letter) of all bond/debenture issuances made against this rating letter to us. The circular also requires you to share this information with us within 2 days after the allotment of the ISIN. We request you to mail us all the necessary and relevant information at debtissue@crisil.com. This will enable CRISIL Ratings to verify and confirm to the depositories, including NSDL and CDSL, the ISIN details of debt rated by us, as required by SEBI. Feel free to contact us at debtissue@crisil.com for any clarification you may need.

Refer to Annexure for Details of Instruments & Bank Facilities

Detailed Rationale

CRISIL Ratings has upgraded its rating on the long term bank facilities and debt instruments of Oxyzo Financial Services Private Limited (Oxyzo) to '**CRISIL A+/CRISIL PPMD A+**' from '**CRISIL A/CRISIL PPMLD A**' and removed the ratings from '**Rating Watch with Developing implications**' while assigned a '**Stable**' outlook to the rating.

Oxyzo Finance is a subsidiary of OFB Tech Pvt Ltd (OFB Tech) holding around 70% stake currently. Earlier, CRISIL Ratings followed a consolidated approach and analysed the credit risk profile of both OFB Tech and Oxyzo Finance at consolidated level on account of common management, business synergies and financial linkages. However, over the last ~2 fiscals the interdependence of Oxyzo and OFB Tech on each other in terms of business synergies has reduced from ~35% in fiscal 2020 to ~15% currently. Further, both the entities have independent management teams. Further, Oxyzo last raised equity of Rs 1528 crore in fiscal 2022 and fiscal 2023 from external investors wherein OFB Tech's stake diluted from 100% ownership. Further, there is a likelihood of further stake dilution of OFB Tech in Oxyzo depending on the further growth requirements. Oxyzo Finance has ventured into other segments such as supply chain financing, debt syndication and also plans to venture into allied financial services activities to become a full stack financial services provider. These businesses are expected to provide a revenue stream by way of fee income. Consequently, CRISIL Ratings has revised its analytical approach to evaluation of the business and financial risk profile of Oxyzo along with its subsidiaries.

The upgrade in the ratings reflects the continued strong capital structure of the company along with comfortable asset quality metrics coupled with a stable and healthy earnings profile. The business model of the entity continues to operate more towards secured loans which constituted around 75% of the portfolio as on December 31, 2022 with the BG backed portfolio constituting around 65% of this.

Since inception, Oxyzo has raised Rs 1962.17 crore as equity, with ~Rs 1528 crore being raised between March'2022 to September'2022. The capitalisation metrics remain comfortable with gearing at ~1.1 times as on December 31, 2022 with a networth of ~Rs 2300 crore. Even over the past five fiscals the gearing metrics for Oxyzo have remained range bound with peak gearing of 2.6 times as on March 31, 2021. Going forward as well the gearing metrics are expected to remain under 4 times on a steady state basis.

Further, the earnings profile of the company continues to remain resilient with ROMA of ~4.4% (annualised) for the nine months ended December 31, 2022. The earnings profile is marked by high NIMs which have remained range bound between 8% to 10%. These metrics have been supported by a substantial improvement in the cost of borrowings for Oxyzo having raised around Rs 1300 crores in the 9 months ended December 31, 2022, at average 8.7%. Further, what supports the earnings profile is supported by the low credit costs given the business model of the entity. The credit costs even during Covid were controlled at 2.3% (fiscal 2020) and stood at 0.8% for the nine months ended December 31, 2022. Going forward as well CRISIL Ratings expects the company to generate healthy internal cash accruals with the fee income also improving.

Given the business model, despite the scaling up in operations from ~Rs 912 crore as on March 31, 2020 to Rs 3707 crore as on December 31, 2022 and a strategic shift from catering to even larger and stabler clients the asset quality metrics for Oxyzo have remained comfortable over the years. Even the early bucket delinquencies have remained comfortable with the GNPA remaining range-bound in 0.9% to 1.3%. Currently, the share of secured portfolio remains at ~75%. Going forward

with the further scale up in operations and diversifications in clientele base and geographical base the ability of the company to maintain the asset quality at current levels will remain a key monitorable. Nevertheless, the ability of the company to continue to grow while maintaining asset quality metrics whilst scaling up the portfolio remains a key monitorable.

CRISIL Ratings has also withdrawn its rating on long term principal protected market linked debenture of Rs 11 crores (See 'Annexure - Details of Rating Withdrawn' for details) as CRISIL Ratings has received independent confirmation that these instruments have been redeemed. The withdrawal is in line with CRISIL Ratings withdrawal policy.

Analytical Approach

CRISIL Ratings has evaluated the business and financial risk profile of Oxyzo along with its subsidiaries (OxyVentures Private Limited, OxyB Securities Private Limited, Oxyzo Investment Managers Private Limited).

Key Rating Drivers & Detailed Description

Strengths:

Healthy ramp-up in scale of operations for Oxyzo

The AUM has grown at a healthy pace over the past 4 fiscals to reach Rs 3707 crores as on December 31, 2022, an annualized growth of 61% over March 31, 2022. Till March 2022, the growth has been at a CAGR of 92%. Of the overall AUM ~69% was purchase finance or short-term product while remaining was long term finance product with ~65% of the same being secured through a Bank Guarantee. For long-term financing book ~80% is secured, while for short term financing ~71% is secured. Securities can be either through Bank Guarantees, charge on immovable assets and current assets with cash flow covers along with property or machinery.

The clientele base of the company has also further diversified with Infrastructure related borrowers forming ~ 65% in fiscal 2021 to ~43% as on December 31, 2022. While the loans to the infrastructure segment continues to be majorly backed by BG, the loans to manufacturing players are backed by a charge on property, parri-passu charge on fixed assets or current assets of the entity, escrow mechanism, etc.

The ability of the company to significantly scale up its operations while continuing to maintain the secured portion at above 70% will remain a key monitorable.

Comfortable asset quality metrics with strong risk protection mechanisms ensuring good asset quality management

With the scale up in the portfolio, the asset quality metrics remain comfortable with the 90+ dpd of Oxyzo Finance at 0.5% as on December 31, 2022 as compared to 0.7% as on March 31, 2022. Even during the pandemic, the 90+ dpd was comfortable at ~1.2% and 0.9% for fiscal 2021 and fiscal 2020 respectively.

Oxyzo has built strong systems and process in place in terms of underwriting which support the asset quality metrics. Apart from the security taken from the borrowers in the form of Bank Guarantee and/or parri-passu charge on fixed/current assets of the borrower, Oxyzo Finance also follows a stringent underwriting process ranging from analysis of the financials of the borrowers, CIBIL check on the promoters, ecosystem feedback, physical meetings in customers office.

What has further supported the asset quality performance is that about 73% of the portfolio is secured of which ~ 65% is secured via Bank Guarantees which provides a comfort against any asset side risks.

However, as the portfolio scales up with new customer acquisitions and geographical expansion, the ability to maintain asset quality will remain a key monitorable.

Strong capitalisation metrics

Capitalisation metrics are comfortable supported by capital infusion done by OFB Tech and other Private Equity players. The company has raised about Rs 1962 crore, with ~Rs 1528 crore being raised between March'2022 to September'2022 from private equity players like Norwest venture partners, Creation Investments India, Tiger global, Alpha Wave ventures and Matrix Partners India till September 2022. Consequently, the network of Oxyzo Finance stood at Rs 1392 crore as on March 31, 2022 and further improved to Rs 2300 crores as on December 31, 2022. Adjusted gearing was comfortable at 1.4 times for Oxyzo as on March 31, 2022 which further improved to 1.1 times as on December 31, 2022. The adjusted gearing is expected to remain under 4 times at Oxyzo Finance.

Furthermore, OFB Tech will continue to support Oxyzo with an earmarked growth capital of ~Rs 350 to Rs 500 crore. CRISIL Ratings expects gearing to be maintained supported by regular capital raise and accretion of profits thus providing a cushion against asset-side risks.

Adequate earnings profile during initial stage of operations itself

Further, the earnings profile of the company continues to remain resilient with ROMA of ~4.4% (annualised) for the nine months ended December 31, 2022. The earnings profile is marked by high NIMs which have remained range bound between 8% to 10%. These metrics have been supported by a substantial improvement in the cost of borrowings for Oxyzo having raised around Rs 1300 crores in the 9 months ended December 31, 2022, at average ~8.7%. Further, what supports the earnings profile is supported by the low credit costs given the business model of the entity. The credit costs even during Covid were controlled at 2.3% (fiscal 2020) and stood at 0.8% for the nine months ended December 31, 2022.

Oxyzo Finance has ventured into other segments such as supply chain financing, debt syndication and also plans to venture into allied financial services activities to become a full stack financial services provider. Going forward as well CRISIL Ratings expects the company to generate healthy internal cash accruals with the fee income also improving.

Weakness:

Inherent vulnerability of the asset quality metrics for the unsecured lending portfolio for the group

The focus of Oxyzo has been to grow the AUM with significant share of secured exposures in the medium term. However, around 26% of the AUM comprises of unsecured^[1] loans. Given the fact that the scale up happened recently, the track record of the lending operations is limited. While the performance in unsecured purchase financing was marginally impacted with GNPA being at 4.7% as on Mar-20, the same has improved to 1.6% as on December 31, 2022. Hence, owing to limited track record of operations, the performance on asset quality of unsecured loans remains a key monitorable.

^[1]Unsecured includes Unsecured long-term loans, unsecured purchase financing loans, semi-secured loans with 20% FLDG and unsecured trade receivables

Liquidity: Strong

As on September 30, 2022, the asset-liability maturity profile of Oxyzo Finance was comfortable with positive cumulative gaps in all buckets. As on January 31, 2021, Oxyzo had adequate liquidity balance (including unutilized bank lines) of ~Rs 1210 crore. This balance, without factoring in any further collections or accretions, covers the estimated debt outflow for 3 months of ~Rs 1015 crores including repayments of rotating WCDL of ~760 crores.

Outlook: Stable

CRISIL Ratings believes that Oxyzo Finance will benefit from its secured BG backed business model and will maintain its comfortable capitalisation, asset quality and earnings metrics.

Rating Sensitivity Factors**Upward Factors**

- Asset quality remaining comfortable with GNPA remaining under 2.0% as the portfolio scales up
- Substantial ramp up in operations with earnings and capitalisation metrics continuing to remain comfortable

Downward Factors

- Any adverse movement in asset quality with GNPA increasing beyond 4% and earnings profile of the group getting impacted
- Reduction in share of secured BG backed assets under management with overall secured portfolio dropping from desired level.
- Any steep decline in revenue and an operating margin below 2% or sizeable provision for bad debts
- Stress in capitalisation metrics with significant jump in adjusted gearing while scaling up the portfolio

About CRISIL Ratings Limited (A subsidiary of CRISIL Limited, an S&P Global Company)

CRISIL Ratings pioneered the concept of credit rating in India in 1987. With a tradition of independence, analytical rigour and innovation, we set the standards in the credit rating business. We rate the entire range of debt instruments, such as bank loans, certificates of deposit, commercial paper, non-convertible/convertible/partially convertible bonds and debentures, perpetual bonds, bank hybrid capital instruments, asset-backed and mortgage-backed securities, partial guarantees and other structured debt instruments. We have rated over 33,000 large and mid-scale corporates and financial institutions. We have also instituted several innovations in India in the rating business, including ratings for municipal bonds, partially guaranteed instruments and infrastructure investment trusts (InvITs).

CRISIL Ratings Limited ('CRISIL Ratings') is a wholly-owned subsidiary of CRISIL Limited ('CRISIL'). CRISIL Ratings Limited is registered in India as a credit rating agency with the Securities and Exchange Board of India ("SEBI").
